

Are you increasing your microbial surveillance program?

Enhance Your Environmental and Finished Product Testing Programs

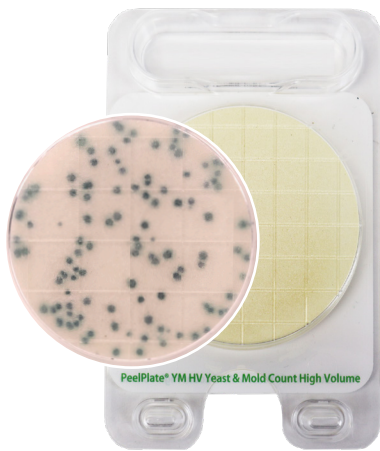

Pathogen detection risk is higher without a validated sanitation and environmental monitoring program.

The Charm 5 mL high volume Peel Plate® microbial tests for Enterobacteriaceae, Yeast and Mold, *E.coli*/coliform provide **5X the sensitivity** compared to standard 1 mL formats.

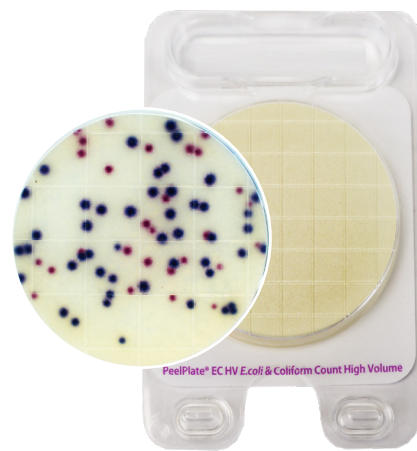

Enhancing your environmental and finished product testing programs provides increased assurance your products will meet the highest standard for consumption by children, elderly, or the immunocompromised.
